DETAILED ACTION

Election/Restrictions

1. Claims 2-6, 10-17, and 19-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 15 November 2005.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 7, 8, 9 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites the limitation "the surface" in line 3. There is insufficient antecedent basis for this limitation in the claim. The substrate, being three dimensional, has more than one surface. It is not clear which surface is being claimed, or if all surfaces are being claimed. The scope of the claim cannot be readily determined.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3723

6. Claims 1, 7-9 and 18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Liebke et al, US005702288A. Please refer to column 4, lines 10 through column 5, lines 35. '288 discloses a method for preparing a substrate, for any further processing, comprising removing material from a surface at a progressively decreasing rate. The surface has a layer of MCrAlY coating, applied by EBPVD. The coating is adherent, (column 4, lines 5-6).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar methods and substrates are cited of interest.
